

# Lachlan Jadezak

Web Developer

## PROFILE

I'm a web developer based in Canberra, doing my best to keep up with and learn the latest technologies in the rapidly advancing world of web development.

I love writing code and solving interesting problems, but also enjoy the creative side when it comes to translating designs to the digital medium of the web.

## SKILLS

Drupal  
CSS  
HTML  
JavaScript  
PHP + Twig  
React  
Git  
Problem Solving

## OVERVIEW

- Learning Drupal and the many tools that come with working on Drupal websites along side self-taught front-end development skills in HTML, CSS, Bootstrap, JavaScript, API's and React has provided a broad base of skills and experiences to pull from
- Solidification of those skills learned by putting them to practice in the workplace, and assisting other developers with any bugs, issues or questions they might have
- Many years of computer usage, debugging, trouble-shooting and programming have led to strong problem-solving skills and understanding of how to seek solutions
- Keeness to learn and ability to find relevant resources results in quick learning of new concepts, languages or programs and adapt to new environments

## EMPLOYMENT HISTORY

### JUNIOR WEB DEVELOPER

#### Oxide Interactive | April 2021 - present

- Fairwork.gov.au and subsites Drupal migration -
  - Analysed existing websites and built components in Drupal for data migration and future content management
  - Developed specific search features requested by the client
  - Overhauled the print to PDF solution to manipulate HTML into matching a complex design
  - Built on existing migration tools to facilitate migration of many articles into Drupal
  - Conducted an accessibility review and rectified issues resulting in an improved experience for all users
- Great Barrier Reef Marine Park Authority Reef Guardian School -
  - Set up initial Drupal theme and reviewed the design to devise a site building plan
  - Built components geared towards a simple user experience, and styled to match the design
  - Developed an interactive map dynamically populated by data from the Drupal database
- Participated in a collaborative agile environment, facilitated by tools like Jira and Git
- Guided fellow junior developers in their learning of Drupal and development techniques
- Assisted other team members with approaching problems and contributed to solutions
